PHILOSOPHICAL MAGAZINE

EDITOR

PROFESSOR N. F. MOTT, M.A., D.Sc., F.R.S.

EDITORIAL BOARD

SIR LAWRENCE BRAGG, O.B.E., M.C., M.A., D.Sc., F.R.S.

SIR GEORGE THOMSON, M.A., D.Sc., F.R.S.

PROFESSOR A. M. TYNDALL, C.B.E., D.Sc., F.R.S.

VOL. XLVI.—SEVENTH SERIES

JANUARY—DECEMBER 1955

LONDON:

TAYLOR & FRANCIS, LTD., RED LION COURT, FLEET STREET, E.C.4.

"Meditationis est perscrutari occulta; contemplationis est admirari perspicua....Admiratio generat quæstionem, quæstio investigationem, investigatio inventionem."—*Hugo de S. Victore.*

——"Cur spirent venti, cur terra dehiscat,
Cur mare turgescat, pelago cur tantus amaror,
Cur caput obscura Phœbus furrugine condat,
Quid toties diros cogat flagrare cometas,
Quid pariat nubes, veniant cur fulmina cœlo,
Quo micet igne Iris, superos quis conciat orbes
Tam vario motu."

J. B. Pinelli ad Mazonium.

CONTENTS OF VOL. XLVI. (Nos. 372–383)

(SEVENTH SERIES)

NUMBER 372—JANUARY

Page

I. The Distribution of the Products of Heavy Ion Reactions with Aluminium. By G. A. Chackett, K. F. Chackett and J. H. Fremlin, University of Birmingham 1

II. Inelastic Neutron Scattering in Manganese. By Joan M. Freeman, Atomic Energy Research Establishment, Harwell 12

III. Inelastic Neutron Scattering in Lithium Seven. By Joan M. Freeman, A. M. Lane and B. Rose, Atomic Energy Research Establishment, Harwell 17

IV. Experiments on Supersonic Flow Past Bodies of Revolution with Annular Gaps of Rectangular Section. By N. H. Johannesen, Fluid Motion Laboratory, University of Manchester 31

V. Experimental Determination of the Aerodynamic Damping on a Vibrating Circular Cylinder. By J. T. Stuart and L. Woodgate, Aerodynamics Division, National Physical Laboratory 40

VI. The Effect of a Magnetic Field on the Heat Conductivity of a Superconductor. By C. A. Renton, Clarendon Laboratory, Oxford 47

VII. Experiments on Supersonic Flow Over Flat-Nosed Circular Cylinders at Yaw—II: Pressure Measurements on a Cylinder at 10° Yaw. By I. M. Hall, Fluid Motion Laboratory, University of Manchester ... 53

VIII. Neutron Deficient Isotopes of Pb and Tl—I: Isomers of Pb and Tl. By I. Bergström and A. H. Wapstra, Nobel Institute of Physics, Stockholm, Sweden 61

IX. Neutron Deficient Isotopes of Pb and Tl—II: Mass Numbers 204, 202, 201, and 200. By K. E. Bergkvist, I. Bergström, C. J. Herrlander, S. Hultberg, H. Slätis, E. Sokolowski, A. H. Wapstra and T. Wiedling, Nobel Institute of Physics, Stockholm, Sweden 65

X. Neutron Deficient Isotopes of Pb and Tl—III: Mass Numbers below 200. By G. Andersson and E. Arbman, The Gustaf Werner Institute for Nuclear Chemistry, University of Uppsala, Uppsala, Sweden and I. Bergström and A. H. Wapstra, Nobel Institute for Physics, Stockholm, Sweden 70

XI. Dislocation Energies and Choice of Slip Plane in Face-Centred Cubic Metals. By A. J. E. Foreman and W. M. Lomer, Atomic Energy Research Establishment, Harwell, Berks 73

XII. Soft X-Ray Spectra of Magnesium–Aluminium, Magnesium–Silicon and Aluminium–Silicon Alloys. By K. Das Gupta and E. Wood, University of Liverpool 77

XIII. Point Defects and the Release of Energy from Deformed Nickel. By J. F. Nicholas, Division of Tribophysics, C.S.I.R.O., University of Melbourne, Australia 87

XIV. Correspondence :—

The Vibrations of a Stressed Framework. By H. C. Longuet-Higgins, The University Chemical Laboratory, Cambridge 98

Angular Correlation in the Reaction ^{14}N (d, $\alpha\gamma\gamma$) ^{12}C. By J. Seed, Cavendish Laboratory, Cambridge 100

Page

An Estimate of the Mean Lifetime of the θ^0-particles. By D. I. Page, The Physical Laboratories, The University, Manchester 103

Reversible Generation of Temperature Waves ('Second Sound') in Liquid Helium II. By N. Kurti and J. McIntosh, Clarendon Laboratory, Oxford 104

Spin Orbit Coupling and the Mesonic Lamb Shift. By E. W. Laing, Department of Natural Philosophy, University of Glasgow 106

Errata 108

XV. Reviews of Books 109

NUMBER 373—FEBRUARY

XVI. Scattering of Electrons by Charged Dislocations in Semiconductors. By W. T. Read, Jr., Bell Telephone Laboratories, Inc., Murray Hill, N.J., U.S.A. 111

XVII. The Structure and Properties of Some Ternary Alloys of Manganese, Zinc and Carbon. By R. G. Butters and H. P. Myers, Department of Mining and Metallurgy, University of British Columbia, Vancouver 8, Canada 132

XVIII. Observations on Negative K-Mesons. By M. W. Friedlander, D. Keefe and M. G. K. Menon, H. H. Wills Physical Laboratory, University of Bristol, R. H. W. Johnston and C. O'Ceallaigh, Institute for Advanced Studies, Dublin and A. Kernan, Physics Department, University College, Dublin (now at University of Rochester, N.Y.) 144

XIX. On the Spin of the θ^0-Meson. By P. T. Matthews, Department of Mathematical Physics, The University Birmingham and Abdus Salam, St. John's College, Cambridge 150

XX. The Measurement of Electron Transfer by x-Ray Diffraction Methods. By P. J. Black, Crystallographic Laboratory, Cambridge ... 155

XXI. Elastic Scattering of High Energy Electrons by Mercury. By G. E. Brown, Department of Mathematical Physics, University of Birmingham and L. R. B. Elton, Wheatstone Department of Physics, King's College, London 164

XXII. The Large-Angle Scattering of μ-Mesons in Iron. By I. B. McDiarmid, The Physical Laboratories, University of Manchester..... 177

XXIII. Collision Processes in Meteor Trails. By H. S. W. Massey and D. W. Side, University College, London 190

XXIV. Oscillatory Motion of a Viscous Liquid in a Thin-Walled Elastic Tube—I: The Linear Approximation for Long Waves. By J. R. Womersley, Physiology Department, St. Bartholomew's Medical College 199

XXV. Optical Constants of Metals in the Infra-red—Principles of Measurement. By J. R. Beattie and G. K. T. Conn, Department of Physics, The University, Sheffield 222

XXVI. Optical Constants of Metals in the Infra-red—Experimental Methods. By J. R. Beattie, Department of Physics, The University, Sheffield 235

Page

XXVII. Correspondence :—
The 'Boundary Effect' in the Thomas–Fermi Model for Atoms. By R. A. Ballinger and N. H. March, Department of Physics, The University, Sheffield 246
XXVIII. Reviews of Books 248

NUMBER 374—MARCH

XXIX. The Growth of Ice Crystals from the Vapour. By D. Shaw and B. J. Mason, Imperial College, London..... 249
XXX. Theory of Ionization Fluctuations. By J. E. Moyal, Department of Mathematics, The University, Manchester..... 263
XXXI. Atmospheric Scattering and Absorption of Ultra-violet Sunlight. By G. F. Walton, University of St. Andrews; Queen's College, Dundee..... 281
XXXII. On the Problem of Energy Eigenvalue and Degeneracy in Quantum Mechanics. By H. Narumi, Yukawa Laboratory, Institute for Chemical Research, Kyoto University, Kyoto, Japan..... 293
XXXIII. Neutron Attenuation Measurements in Heavy and Light Water at Energies between 109 and 169 mev. By R. Alphonce, A. Johansson, A. E. Taylor and G. Tibell, The Gustaf Werner Institute for Nuclear Chemistry, University of Uppsala, Uppsala, Sweden..... 295
XXXIV. Study of Charged Heavy Unstable Cosmic Ray Particles. By P. R. Barker, D. M. Binnie, B. D. Hyams and R. J. Rout, The Physical Laboratories, The University, Manchester..... 300
XXXV. Measurements of the Lifetimes of Charged Heavy Unstable Particles. By P. R. Barker, D. M. Binnie, B. D. Hyams, R. J. Rout and J. Shepherd, The Physical Laboratories, The University, Manchester 307
XXXVI. Second-Order Radiative Corrections to the Magnetic Moment of a Bound Electron. By E. H. Lieb, Mathematical Physics Department, The University, Birmingham..... 311
XXXVII. An Exact Solution of the Spherical Blast Wave Problem. By J. Lockwood Taylor, Norges Tekniske Høgskole, Trondheim, Norway..... 317
XXXVIII. The Measurement of Photoneutron Yields with a Sodium Iodide Crystal. By K. G. McNeill, Department of Natural Philosophy, The University, Glasgow..... 321
XXXIX. Self-Excited Oscillations in an Open Circular Water Tank. By A. M. Binnie, Trinity College, Cambridge..... 327
XL. A New Vacuum Calorimeter for Low Temperatures. By K. G. Ramanathan and T. M. Srinivasan, National Physical Laboratory of India, New Delhi..... 338
XLI. The Emission of Alpha Particles from Argon under Bombardment with Neutrons. By E. H. Bellamy and F. C. Flack, Department of Natural Philosophy, Glasgow..... 341
XLII. Spallation of Elements in the Mass Range 51–75. By S. G. Rudstam, The Gustaf Werner Institute for Nuclear Chemistry, University of Uppsala, Uppsala, Sweden..... 344

Page

XLIII. Correspondence :—
Radioactive ^{69}As and ^{70}As. By F. D. S. Butement and E. G. Prout, Atomic Energy Research Establishment, Harwell 357
The Elastic Scattering of Protons by Helium 3. By D. R. Sweetman, Department of Physics, The University of Birmingham 358
XLIV. Reviews of Books 361

NUMBER 375—APRIL

XLV. The Effect of Discontinuous Space Charge on Rectifier Characteristics. By G. G. Wiles, University of the Witwatersrand, Johannesburg 363
XLVI. A Contribution to the Theory of Nuclei with a Diffuse Surface. By Z. Janković, CERN, Theoretical Study Group 376
XLVII. The Disintegration of ^{7}Be by Slow Neutrons. By R. C. Hanna, Atomic Energy Research Establishment, Harwell 381
XLVIII. Further Evidence for the Electron-Decay of K-mesons. By R. H. W. Johnston and C. O'Ceallaigh, Dublin Institute for Advanced Studies 393
XLIX. Brillouin Zones of Some Intermetallic Compounds. By P. J. Black, Royal Society Mr. and Mrs. John Jaffe Donation Student, Cavendish Laboratory, Cambridge 401
L. Thermal Acceptors in Germanium. By R. J. Hodgkinson, Communication from the Staff of the Research Laboratories of the General Electric Co. Ltd., Wembley, England 410
LI. A New Treatment of Anharmonicity in Lattice Thermodynamics : I. By D. J. Hooton, Department of Mathematical Physics, University of Edinburgh 422
LII. A New Treatment of Anharmonicity in Lattice Thermodynamics : II. By D. J. Hooton, Department of Mathematical Physics, University of Edinburgh 433
LIII. Correspondence :—
Paramagnetic Resonance in Sodium and Potassium Superoxides. By J. E. Bennett, D. J. E. Ingram and M. C. R. Symons, University of Southampton, and P. George and J. Stanley Griffith, Department of Colloid Science, Cambridge 443
The Decay of 175 and 177 Ytterbium. By H. de Waard, Nobel Institute for Physics, Stockholm 445
Angular Correlation of Gamma Rays in ^{175}Lu. By L. Åkerlind, B. Hartmann and T. Wiedling, Laboratory of Physics, University of Stockholm, Sweden 448
Interaction of Dislocations and F-Centres in Sodium Chloride Single Crystals. By S. Amelinckx, W. Van der Vorst, R. Gevers and W. Dekeyser, Laboratorium voor Kristalkunde, der Rijksuniversiteit, Rozier, 6, Gent (Belgium) 450
LIV. Reviews of Books 452

NUMBER 376—MAY

Page

LV. The Optical and Electrical Properties of Single Crystals of Sodium Niobate. By L. E. Cross and B. J. Nicholson, Department of Physics, University of Leeds 453

LVI. Notes on the Energy Spectra and Frequencies of Production of V^0-particles. By D. B. Gaythér, The Physical Laboratories, The University, Manchester, and C. C. Butler, The Physics Department, Imperial College, London 467

LVII. Radioactive ^{184}Tantalum. By F. D. S. Butement and A. J. Poë, Atomic Energy Research Establishment, Harwell 482

LVIII. Some Vibrational Properties of Solid Helium. By D. J. Hooton, Department of Mathematical Physics, University of Edinburgh 485

LIX. The Magnetic Moments of Cobalt–Copper Alloys. By J. Crangle, Physics Department, The University, Sheffield..... 499

LX. Deviations from Vegard's Law. By J. Friedel, Centre de Recherches Métallurgiques de l'Ecole des Mines de Paris 514

LXI. Glancing Angle Reflection of Elastic Waves from a Free Boundary. By F. C. Roesler, Imperial Chemical Industries Limited, Butterwick Research Laboratories, Welwyn, Herts. 517

LXII. Reflection of Elastic Waves from a Free Boundary. By D. G. Christie, Imperial Chemical Industries Limited, Butterwick Research Laboratories, Welwyn, Herts. 527

LXIII. On the Optical Model for Nucleon Scattering by Oxygen. By Y. Fujimoto and A. Hossain, H. H. Wills Physical Laboratory, University of Bristol 542

LXIV. Non-linear Dissipative Processes in Liquid Helium II. By H. E. Hall and W. F. Vinen, The Royal Society Mond Laboratory, Cambridge 546

LXV. Diurnal and Seasonal Wind Variations in the Upper Atmosphere. By J. S. Greenhow and E. L. Neufeld, Jodrell Bank Experimental Station, University of Manchester 549

LXVI. Correspondence :—

Loss of Electrons from Fast Nitrogen Ions in Collisions with Single Gas Molecules. By K. G. Stephens and D. Walker, Physics Department, University of Birmingham 563

Chlorine 38, 34 Ratios from Heavy Ion Barbardments. By A. E. Souch, Physics Department, The University of Birmingham 566

On the Divergence of the Perturbation Method in Field Theory. By S. F. Edwards, Mathematical Physics Department, The University of Birmingham..... 569

NUMBER 377—JUNE

LXVII. The Production of Hyperons and Heavy Mesons. By G. D. James and R. A. Salmeron, The Physical Laboratories, The University, Manchester..... 571

LXVIII. Measurement of Ionization in Nuclear Emulsions. By P. H. Fowler and D. H. Perkins, H. H. Wills Physical Laboratory, University of Bristol 587

LXIX. The Radioactivity of ^{183}Ta, ^{185}Ta, ^{183m}W and ^{185m}W. By A. J. Poë, Atomic Energy Research Establishment, Harwell..... 611

Page

LXX. Some Magnetic Properties of Dilute Ferromagnetic Alloys : I. By G. Bate, D. Schofield and W. Sucksmith, University of Sheffield 621

LXXI. The Multiple Scattering of Positrons and Electrons by Nitrogen and Argon. By N. Cusack and P. Stott, Birkbeck College, London.... 632

LXXII. The Production of Neutrons and Protons by the Bombardment of Boron by Low Energy Alpha-Particles. By E. S. Shire and R. D. Edge, Cavendish Laboratory, Cambridge 640

LXXIV. The Nuclear Interactions produced in Carbon, Nitrogen and Oxygen by 140 mev Protons. By H. Muirhead and W. G. V. Rosser, Department of Natural Philosophy, University of Glasgow 652

LXXV. Positrons from ^{25}Al and ^{26m}Al. By B. Elbek, B. S. Madsen and O. Nathan, Institute for Theoretical Physics, University of Copenhagen 663

LXXVI. The Bond Lengths of Unsaturated Hydrocarbons. By Herbert D. Deas, St. Salvator's College, The University of St. Andrews 670

LXXVII. Correspondence :—

The Bombardment of Chlorine by Nitrogen Ions. By G. W. Greenlees and A. E. Souch, Physics Department, University of Birmingham 682

LXXVIII. Reviews of Books 685

NUMBER 378—JULY

LXXIX. The Internal Conversion Electron Spectrum of ^{241}Am. By J. F. Turner, Atomic Energy Research Establishment, Harwell, Berks. 687

LXXX. A Note on the Interatomic and Lattice Potentials in Solid Helium. By D. J. Hooton, Max Planck Inst. für Physik, Göttingen... 701

LXXXI. Annealing of Point Defects in Metals and Alloys. By W. M. Lomer, Atomic Energy Research Establishment, Harwell and A. H. Cottrell, Department of Physical Metallurgy, University of Birmingham..... 711

LXXXII. On the Thermal Expansion of Solids at Low Temperatures. By T. H. K. Barron, Clarendon Laboratory, University of Oxford 720

LXXXIII. Quench Hardening in Aluminium Single Crystals. By R. Maddin, The John Hopkins University, Baltimore, Md., U.S.A., and A. H. Cottrell, Department of Physical Metallurgy, University of Birmingham..... 735

LXXXIV. The Specific Heats of Magnesium and Zinc. By P. L. Smith, Clarendon Laboratory, Oxford 744

LXXXV. The Specific Heats of Lithium Fluoride, Sodium Chloride and Zinc Sulphide at Low Temperatures. By Douglas L. Martin, Department of Physics, Queen Mary College, University of London..... 751

LXXXVI. Fields around Impurity Atoms in Metals. By L. C. R. Alfred and N. H. March, Department of Physics, The University, Sheffield 759

LXXXVII. Polarization in Nucleon Scattering at Various Energies. By Richard Wilson, Clarendon Laboratory, Oxford 769

LXXXVIII. Calculation of Viscous Flow around Spheres at Low Reynold's Numbers. By T. Pearcey and B. McHugh, Division of Radiophysics, C.S.I.R.O., Sydney, Australia 783

LXXXIX. The Selection of Potentials in Nucleon–Nuclear Scattering Problems. By G. C. Morrison, H. Muirhead and P. A. B. Murdoch, Department of Natural Philosophy, University of Glasgow 795

Page

XC. A Note on the Branching Ratio of the D–D Reactions. By K. G. McNeill, Department of Natural Philosophy, The University, Glasgow, Scotland 800

XCI. Correspondence :—

An Accurate Determination of the Energy of the D(d, n)^{3}He Reaction. By Sonja Subotić and Bogdan Maglić, Institute of Nuclear Sciences, ' Boris Kidric ', Belgrade.. 805

An Analysis of the Neutrons from ^{7}Li(dn)^{8}Be at 880 kev. By W. M. Gibson, Physics Department, Queen's University of Belfast, and D. J. Prowse, H. H. Wills Physical Laboratory, University of Bristol 807

The Strength of Single Crystal and Polycrystalline Corundum. By Elizabeth A. Jackman and J. P. Roberts, Royal Aircraft Establishment, Farnborough, Hants 809

The Thermal and Electrical Conductivity of Palladium at Low Temperatures. By W. R. G. Kemp, P. G. Klemens, A. K. Sreedhar and G. K. White, Division of Physics, National Standards Laboratory, Commonwealth Scientific and Industrial Research Organization, Sydney 811

NUMBER 379—AUGUST

XCII. Impurity Diffusion in Polar Crystals. By A. B. Lidiard, Atomic Energy Research Establishment, Harwell, Berks 815

XCIII. The Cross Section for the Reaction ^{10}B(pα)^{7}Be at Proton Energies below 200 kev. By G. G. Bach and D. J. Livesey, Physics Department, University of Birmingham..... 824

XCIV. Scattering of Electrons and Holes by Charged Donors and Acceptors in Semiconductors. By R. B. Dingle, Department of Physics, University of Western Australia, Nedlands 831

XCV. Cross Sections for the Reaction ^{12}C(γ3α) in the Energy Range 12–18 mev. By J. H. Carver, H. J. Hay and E. W. Titterton, Australian National University, Canberra 841

XCVI. On the Gravitational Effects of Distant Rotating Masses. By L. Bass and F. A. E. Pirani, Dublin Institute for Advanced Studies, Dublin 850

XCVII. A Rotating-Lobe Interferometer and its Application to Radio Astronomy. By R. Hanbury Brown, H. P. Palmer and A. R. Thompson, Jodrell Bank Experimental Station, Lower Withington, Macclesfield, Cheshire..... 857

XCVIII. The Surface Energies of the Alkali Metals. By J. W. Taylor, Atomic Energy Research Establishment, Harwell 867

XCIX. Proton–Proton Elastic Scattering at 950 mev. By P. J. Duke, W. O. Lock and P. V. March, Department of Physics, University of Birmingham, W. M. Gibson and R. McKeague, Department of Physics, Queen's University, Belfast and I. S. Hughes and H. Muirhead, Department of Natural Philosophy, University of Glasgow 877

C. Photometric Measurement of Ionization in Cloud Chambers. By I. Butterworth, The University, Manchester 884

Page

CI. The Structure and Magnetic Properties of the Alloy Mn_3AlC. By R. G. Butters and H. P. Myers, The Department of Mining and Metallurgy, The University of British Columbia, Vancouver 8, Canada.. 895

CII. The High Temperature Susceptibility of a Lattice of Permanent Dipoles. By B. K. P. Scaife, Dublin Institute for Advanced Studies .. 903

CIII. Electron Transport in Copper and Dilute Alloys at Low Temperature—III : Solid Solutions of Iron in Copper. By W. B. Pearson, Division of Physics, National Research Council, Ottawa 911

CIV. Electron Transport in Copper and Dilute Alloys at Low Temperature—IV : Resistance Minimum : Temperature of Occurrence as a Function of Solute Concentration. By W. B. Pearson, Division of Physics, National Research Council, Ottawa. 920

CV. Correspondence :—

Gamma-rays from Inelastic Scattering of D–T Neutrons from Carbon 12 and Oxygen 16. By L. E. Beghian, D. Hicks and B. Milman, Clarendon Laboratory, Oxford 924

NUMBER 380—SEPTEMBER

CVI. The Sensitivity of Electron Diffraction as a Means of Detecting Thin Surface Films : I. By R. C. Newman and D. W. Pashley, Physics Department, Imperial College, London 927

CVII. The Electromagnetic Field in a Lagrangian Quantum Theory. By K. V. Roberts, Department of Mathematics, University College, London 941

CVIII. The Nuclear Orientation of Cobalt 57. By G. R. Bishop, M. A. Grace, C. E. Johnson, A. C. Knipper, H. R. Lemmer, J. Perez y Jorba and R. G. Scurlock, Clarendon Laboratory, Oxford 951

CIX. On the Scattering Cross Section of an Obstacle. By D. S. Jones, Department of Mathematics, University of Manchester 957

CX. Inelastic Scattering of 2·5 mev Neutrons by ^{54}Fe and ^{56}Fe. By L. E. Bechian, D. Hicks and B. Milman, Clarendon Laboratory, Parks Road, Oxford 963

CXI. Brittle Fracture and Yielding. By A. N. Stroh, Cavendish Laboratory, Cambridge 968

CXII. Spin–Orbit Coupling and the Density Distribution in Heavy Nuclei. By R. J. Blin-Stoyle, Clarendon Laboratory, Oxford 973

CXIII. The Low Lying Levels of ^{25}Al. By L. L. Green, J. J. Singh and J. C. Willmott. Nuclear Physics Research Laboratory, University of Liverpool 982

CXIV. Optical Constants of Metal in the Infra-Red—Conductivity of Silver, Copper and Nickel. By J. R. Beattie and G. K. T. Conn. Department of Physics, The University, Sheffield 989

CXV. Resonance Ansorption of Nickel in the Infra-Red Region. By J. R. Beattie and G. K. T. Conn, Department of Physics, The University, Sheffield..... 1002

CXVI. Vacancies in Monovalent Metals. By F. G. Fumi, Cavendish Laboratory, Cambridge 1007

CXVII. Correspondence :—

Effect of Heat Treatment on the Internal Friction of Aluminium Crystals. By M. Levy, The Haloid Company, and M. Metzger, University of Illinois 1021

Page

Impurity Diffusion in Polar Crystals. By J. Teltow, Institut für Kristallphysik, Deutsche Akademie der Wissenschaften, Berlin 1026

Strain-Hardening of a Metal by Laminar or Turbulent Flow. By W. A. Wood, Metallurgy Research Department, University of Melbourne 1028

Upper Limits for the Lifetime of the Excited States of Titanium 46. By R. E. Azuma, Department of Natural Philosophy, The University, Glasgow..... 1031

The Lifetime of the First Excited State of Thallium 203. By R. E. Azuma and G. M. Lewis, Department of Natural Philosophy, The University, Glasgow 1034

NUMBER 381—OCTOBER

CXVIII. The Four Possible Waves in a Magneto-Ionic Medium. By J. H. Piddington, Division of Radiophysics, C.S.I.R.O., Sydney, Australia 1037

CXIX. A Study of Transparent, Highly Conducting Gold Films. By E. J. Gillham, J. S. Preston and Betty E. Williams..... 1051

CXX. Measurement of the Elasticity of Solid Argon with an Ultrasonic Interferometer. By J. R. Barker and E. R. Dobbs, Department of Physics, Queen Mary College, University of London 1069

CXXI. The Electrical Properties of Electroluminescent Phosphors. By A. N. Ince and C. W. Oatley, Engineering Laboratory, University of Cambridge 1081

CXXII. Ultrasonic Attenuation in Metals. By A. B. Pippard, The Royal Society Mond Laboratory, Cambridge..... 1104

CXXIII. Thermodynamics of a Sheared Superconductor. By A. B. Pippard, The Royal Society Mond Laboratory, Cambridge 1115

CXXIV. Formation of Etch Pits on Slip Lines in Aluminium. By G. Wyon and J. M. Marchin, Centre de Recherches Metallurgiques de l'Ecole des Mines de Paris 1119

CXXV. Combination Spectra in Long-Period Variable Stars. By C. E. R. Bruce, The British Electrical and Allied Industries Research Association 1123

CXXVI. Correspondence :—

The Decay Scheme of ^{140}La. By C. F. Coleman, Atomic Energy Research Establishment, Harwell 1132

Electric Quadrupole Lifetimes in Even–Even Nuclei. By C. F. Coleman, Atomic Energy Research Establishment, Harwell..... 1135

The X-ray Spectra of μ-mesonic Copper and Lead. By F. D. S. Butement, Atomic Energy Research Establishment, Harwell 1136

A Note on the Ground State Spin of ^{177}Hafnium. By B. Hartmann and T. Wiedling, Laboratory of Physics, University of Stockholm, Sweden 1139

Screw Dislocations and Polytypism of Cadmium Iodide. By Richard S. Mitchell, Department of Geology, University of Virginia, Charlottesville 1141

Ionization at the Origin of Electron Pairs, and the Lifetime of the Neutral Pion. By D. H. Perkins, H. H. Wills Physical Laboratory, University of Bristol 1146

Page

On the Magnetoresistance Effect in Metals. By ROSEMARY A. COLDWELL-HORSFALL and D. TER HAAR, Department of Natural Philosophy, St. Salvator's College, St. Andrews 1149

Slip in the Interior of Aluminium–Silver Single Crystals. By N. A. MCKINNON, Aeronautical Research Laboratories, Australia 1150

Errata 1152

CXXVII. Reviews of Books 1153

NUMBER 382—NOVEMBER

CXXVIII. The Remanent Magnetization of Haematite Powders. By E. P. WOHLFARTH, Department of Mathematics, Imperial College, London 1155

CXXIX. Radioactive ^{186}Tantalum. By A. J. POË, Atomic Energy Research Establishment, Harwell 1165

CXXX. On the Linear Work Hardening Rate of Face-centred Cubic Single Crystals. By J. FRIEDEL, Centre de Recherches Métallurgiques de l'Ecole des Mines de Paris 1169

CXXXI. Effect of Temperature on the Flow Stress of Work-Hardened Copper Crystals. By M. A. ADAMS, Department of Physical Metallurgy, University of Birmingham and A. H. COTTRELL, F.R.S., Atomic Energy Research Establishment, Harwell; previously Department of Physical Metallurgy, University of Birmingham 1187

CXXXII. The Generation of Lattice Defects by Moving Dislocations, and its Application to the Temperature Dependence of the Flow-Stress of F.C.C. Crystals. By ALFRED SEEGER, Max-Planck-Institut für Metallforschung, and Institut für theoretische und angewandte Physik der Technischen Hochschule Stuttgart, Stuttgart, Germany 1194

CXXXIII. Impurity Diffusion in Crystals (mainly Ionic Crystals with the Sodium Chloride Structure). By A. B. LIDIARD, Atomic Energy Research Establishment, Harwell, Berks. 1218

CXXXIV. The 27-day Recurrence Tendency of Cosmic Ray Intensity. By I. J. VAN HEERDEN and T. THAMBYAHPILLAI, University of Manchester 1238

CXXXV. Ambipolar Thermodiffusion of Electrons and Holes in Semiconductors. By P. J. PRICE, I. B. M. Watson Scientific Computing Laboratory, Columbia University, New York City, U.S.A. 1252

CXXXVI. Correspondence :—

Observations on Etched Crystals of Barium Titanate. By D. S. CAMPBELL, The Plessey Co. Ltd., Caswell Research Laboratories, Towcester, Northants. 1261

CXXXVII. Reviews of Books 1263

NUMBER 383—DECEMBER

CXXXVIII. Non-Linear Regenerative Extraction of Synchrocyclotron Beams. By K. J. LE COUTEUR, Department of Theoretical Physics, Liverpool University, and S. LIPTON, Department of Statistics, Rothamsted Experimental Station 1265

Page

CXXXIX. The Nuclear Scattering of Electrons and Positrons at 10 Mev. By W. Bosley and I. S. Hughes, Department of Natural Philosophy, University of Glasgow 1281

CXL. Nuclear Orientation of Cerium 141. By C. F. M. Cacho, M. A. Grace, C. E. Johnson, A. C. Knipper, R. G. Scurlock and R. T. Taylor, Clarendon Laboratory, Oxford 1287

CXLI. The Lattice Spacings of Solid Solutions of Titanium, Vanadium, Chromium, Manganese, Cobalt and Nickel in α-Iron. By A. L. Sutton and W. Hume-Rothery, The Inorganic Chemistry Laboratory, Oxford 1295

CXLII. On the Application of Eigenfunction Expansions to the Problem of the Thermal Instability of a Fluid Sphere Heated Within. By G. E. Backus, Physics Department, University of Chicago 1310

CXLIII. The Influence of Retardation on the London–van der Waals Forces. By J. W. Leech, Queen Mary College, University of London 1328

CXLIV. K-capture in the Decay of Chlorine 36. By R. W. P. Drever and A. Moljk, Department of Natural Philosophy, The University, Glasgow 1337

CXLV. Surface Distributions of Dislocations in Metals. By C. J. Ball and P. B. Hir^{9}ch, Crystallographic Laboratory, Cavendish Laboratory, Cambridge 1343

CXLVI. The Anisotropic Absorption of the Visible Bands in Irradiated α-Quartz. By E. W. J. Mitchell and E. G. S. Paige, University of Reading 1353

CXLVII. Correspondence :—

The Mean Lifetime and Some Properties of θ^0-Particles : A Correction to Previously Published Data. By D. B. Gaythér, The Physical Laboratories, The University, Manchester 13 1362

CXLVIII. Reviews of Books 1365

Index to Volume 1367

PLATES

1 & 2. Illustrative of N. H. Johannesen's Paper on Experiments on Supersonic Flow Past Bodies of Revolution with Annular Gaps of Rectangular Section.

3. Illustrative of D. Shaw and B. J. Mason's Paper on The Growth of Ice Crystals from the Vapour.

4 & 5. Illustrative of P. R. Barker, D. M. Binnie, B. D. Hyams and R. J. Rout's Paper on the Study of Charged Heavy Unstable Cosmic Ray Particles.

6. Illustrative of S. Amelinckx, W. van der Vorst, R. Gevers and W. Dekeyser's Correspondence on Interaction of Dislocations and F-Centres in Sodium Chloride Single Crystals.

7–11. Illustrative of D. G. Christie's Paper on Reflection of Elastic Waves from a Free Boundary.

12 & 13. Illustrative of G. D. James and R. A. Salmeron's Paper on the Production of Hyperons and Heavy Mesons.

14. Illustrative of R. Maddin and A. H. Cottrell's Paper on Quench Hardening in Aluminium Single Crystals.

15–18. Illustrative of R. C. Newman and D. W. Pashley's Paper on The Sensitivity of Electron Diffraction as a Means of Detecting Thin Surface Films—I.

19. Illustrative of W. A. Wood's Correspondence on Strain-Hardening of a Metal by Laminar or Turbulent Flow.

20–22. Illustrative of E. J. Gillham, J. S. Preston and Betty E. Williams's Paper on A Study of Transparent, Highly Conducting Gold Films.

23–25. Illustrative of G. Wyon and J. M. Marchin's Paper on Formation of Etch Pits on Slip Lines in Aluminium.

26 & 27. Illustrative of N. A. McKinnon's Correspondence on Slip in the Interior of Aluminium–Silver Single Crystals.

28 & 29. Illustrative of D. S. Campbell's Correspondence on Observations on Etched Crystals of Barium Titanate.
